WHO SHOULD TAKE THIS COURSE?

The course is designed for managers and supervisors who need to manage safety in compliance with their organisation's policy, best practices and health and safety legislation. It is also aimed at people new to health and safety as part of a management training programme.

BENEFITS OF IOSH MANAGING SAFELY

- Ensures a robust understanding of health and safety best practices and legislation.
- Participants explore practical strategies that can be employed in day-to-day management to improve safety performance.
- An internationally recognised qualification from the Institution of Occupational Safety and Health (IOSH).
- SCORM compatible.

COURSE DURATION

This course takes approximately 24 hours to complete in the participant's own time. Most people complete the course in less than 3 months.

Assessment and Certificate

- At the end of the course there is a multiple-choice assessment to complete consisting of 30 questions.
- Participants must also submit a risk assessment of their workplace or a setting of their choice.
- Participants will receive a certificate on successful completion of the course.

COURSE AIMS

By the end of this course participants will understand:

- ✓ Responsibilities for promoting health and safety in the workplace.
- ✓ The human, legal, and financial consequences of incidents.
- ✓ How to build a positive health and safety culture.
- ✓ How to identify hazards, measure risks and conduct a risk assessment.
- ✓ How to control risks by implementing the right precautions.
- ✓ How to review safety systems, introduce new controls and implement changes to improve health and safety.
- ✓ How to measure the performance of health and safety in the workplace.
- ✓ How to report and investigate incidents.
