

Fire Marshall/Warden Awareness & Practical Fire Extinguisher Training (non-live fires)

Introduction

The aim of our fire awareness session is to give delegates an insight into the risks and counter measures involved in the day-to-day workings in both business and domestic situations. With particular emphasis on evacuation procedures and safety.

We recommend that the optimum number of delegates for any one session be 15 as this allows all delegates to have reasonable 'hands on' experience.

Duration: 3 Hour Workshop

www.oaktree-training.co.uk

Benefits

- An introduction to Fire Awareness to allow delegates to identify specific issues within their own working environment, with regard to evacuation procedures.
- Provide a brief overview of Fire Safety Legislation.
- Understand appreciation of causation and effect of fire.
- Introduction to fire extinguishers, colour coding, correct usage and application and equipment.
- Questionnaire based talk back session with delegates split into teams.
- Hands on experience in live fire situations using standard equipment and/or specific types of extinguishers pertinent to location risk.
- Role, responsibilities and recording.
- Review of premises Fire Safety Policy, Fire Risk Assessments, and Fire Evacuation Plan.
- Review of session and personal action plan
