

NEBOSH National Certificate in Environmental Management

This newly launched course is designed to provide a sound foundation to the fundamental elements of environmental management. It has quickly become a very popular addition to the NEBOSH National General Certificate, or it can be taken as a stand-alone certificate. This certificate is aimed at responsible people who make day to day decisions on environmental matters.

Who should attend

Managers, supervisors and employees who have responsibility for managing environmental issues, as part of their day to day duties.

No previous environmental management knowledge is required but candidates should note the assessment includes a written report, after the course is completed.

COURSE DURATION: 5 Day Course

Learners are required to be committed to their coursework and it is recommended that private study is completed to achieve the required standards.

Course Content

The syllabus takes a risk management approach, based on best practice and international industry standards:

- Environmental management systems and impact assessments;
- Sources and use of energy and energy efficiency;
- Control of pollution;
- Planning for and dealing with environmental emergencies.

Aims and Objectives

On successful completion of this course delegates will have a sound understanding of the principles of environmental management and have the tools to build an effective environmental culture within their organisation.

Assessment

Written examination and a practical assessment with a written report.

Certification

This course is assessed by NEBOSH. Certificates are issued to all successful candidates
