

Introduction to ISO 14001

INTRODUCTION

This one-day course is designed for those who wish to know more about ISO 14001 and how it is a useful model for managing and improving environmental impacts resulting from the business operation.

The aim of this course is to provide delegates with an overview of the purpose and requirements of the standard as a tool for the management of environmental aspects and impacts

COURSE OBJECTIVES

- By the end of the course, delegates will learn:

The value of an effective EMS and its contribution to your business
The purpose and intent of ISO 14001 and its relationship to other standards
Essential definitions and terminology
Key requirements of ISO 14001 and how they relate to each other
To determine environmental aspects and impacts
The importance and relevance of environmental legislation

WHAT YOU NEED TO PREPARE

No previous knowledge of auditing, environmental management systems or ISO 14001 training is required

COURSE DURATION: 1 Day Course
